

### COMPREHENSIVE MANAGEMENT SYSTEMS

Integrate your key processes and develop your management team into a well-balanced, high performance organization. Maintain certification to ISO9001, ISO14001, AS9100, OHSAS18001, TS16949 and others while incorporating lean and Six Sigma for optimal return on your company's investment.

Over 20 years of diverse, hands-on experience in management, sales & marketing, strategic planning, consulting, training and quality process improvement make me the ideal champion to improve your performance. I can:

- Develop a customized management system that works for YOU!
- Mentor and coach your leadership group into a cohesive, performance-centric team
- Design, develop and deliver training programs integrating quality, safety and environmental into one comprehensive learning experience
- Deliver hands-on learning workshops on subjects such as KPIs, Corrective Action, Internal Auditing, Lean and Six Sigma
- Develop and support a highly effective internal audit strategy that will yield the results you're looking for

# Management systems that work for your business.

TIME IS MONEY. SPEND IT WISELY.

Does your management system cost more than it pays?

Are you ISO certified and still waiting for improved performance?

Is your company mission being realized?

Leverage the resources you invest in the management of your business to create an integrated system your whole organization can use and find useful. Keep things simple by implementing the key processes you need to satisfy your customers' needs, without any of the extra "fluff" you don't need. Effortlessly maintain ISO (and other) certification, because a well-designed, lean management system that works for you will easily meet your compliance requirements.

## flexible solutions to make your management system work for you

### OPERATIONS EXCELLENCE

Transform your organization into a united team with clearly defined vision, goals and direction. Establish a management system that meets all industry compliance requirements, but one that also provides the guidance your organization needs to compete, excel and achieve its objectives.

### LEAN AND SIX SIGMA

Incorporate lean principles into your management system to ensure that only those processes needed to fulfill your internal and external customers' requirements are in play. Eliminate waste and reduce variation throughout your organization to realize your optimal performance.

### SYSTEM SOLUTIONS

- CUSTOM MANAGEMENT SYSTEMS
- MANAGEMENT DEVELOPMENT
- LEARNING WORKSHOPS

### MANAGEMENT SYSTEMS

Develop new systems or perform gap analyses to identify opportunities to improve your systems, or improve your compliance. Consolidate resources spent on quality, safety, environmental and operations. Specialty areas include KPI performance review (management review) and internal audits.

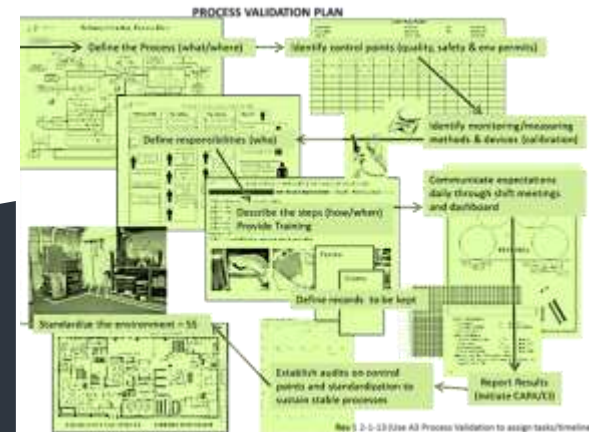

### CUSTOM TRAINING PROGRAMS

Support your training team to create custom, comprehensive learning experiences using "8 week Boot Camps" to define your processes with regard to safety, quality, environmental and operations to build a world class workforce.

### HANDS-ON LEARNING WORKSHOPS

Apply new skills using "kaizen event" learning experiences that give your team the knowledge they need, plus the opportunity to apply and

### SIMPLIFYING BUSINESS FOR YOU

Using lean and Six Sigma to find the simplest way to manage your business to meet your needs and satisfy your customers.
